

AYAAN SIDDIQUI

FULL-STACK DEVELOPER

Custom Society Scheme 33 | ayaan.ordin@gmail.com | ayaansid.com | +92-371 0102276

I am a versatile creator, blending creativity and code as a Graphic Designer and Full-Stack Developer. I pioneered Therapcha, the first therapy-based AI model, redefining mental wellness with technology. Passionate about crafting experiences that are visually stunning and functionally seamless

AREA OF EXPERTISE

Creative Problem Solving	Therapy-Based AI Model Development	Full-Stack Web & App Development
Digital Experience Design	AI & Machine Learning Integration	Content Creation

KEY ACHIEVEMENTS

- Honorable Speaker.** Honored as a speaker at FAST University, representing my perspective in a political debate and engaging with students on critical contemporary issues.
- Winner Of Aptech.** Winner of Aptech Internal Vision 2025, where I created Therapcha, the first therapy-based AI model, showcasing innovation at the intersection of technology and mental wellness.

PROFESSIONAL EXPERIENCE

Adsgetsbetter

August 2025 - Present

- Developed the Honda Port Qasim website, delivering a seamless and immersive brand experience.
- Built an interactive game for the Golden Ink Exhibition in HD, engaging users through creative storytelling.
- Designed and developed the Vital Media website using React, focusing on responsiveness and performance.
- Crafted the River Denim website, combining sleek design with smooth functionality.
- Additionally, contributed to content writing — creating engaging tech-focused and reels content for Zahanat AI, Datavault, and Mehwish Salman Ali, effectively blending creativity with technical insight.

Vertex Technologies Pvt Ltd

January 2024 - August 2024

- Developed an Employee Management and Invoice Generator system for American Security Guard, handling both frontend and backend for efficient operations.
- Built the Hawari website with full frontend and backend functionality, ensuring seamless user experience and robust performance.

Lets grow More

August 2023 - November 2023

- Developed a Student Data Entry and User Details Management System using React, enabling smooth data handling and a responsive interface.
- Created another student data management site using HTML, CSS, and JavaScript, focusing on simplicity, usability, and performance.
